

Giulia Placeholder

Data analyst who builds web dashboards

Via Esempio 12, 00000 Placeholder Town · +39 000 000 0000 · github.com/octocat · born
1 January 2000

PROFILE

I spent four years turning spreadsheets into reports nobody read. Then I built my first web dashboard, and people started using the numbers. Since then I build small, clear dashboards with plain JavaScript and SVG charts, and I care about making charts readable for everyone.

EXPERIENCE

Data Analyst, Example Logistics

2022 – present. Build web dashboards for the operations team; replaced twelve weekly spreadsheets with one page.

Junior Analyst, Placeholder Bank

2020 – 2022. Prepared monthly reports and cleaned data.

PROJECTS

Delivery Dashboard

A dashboard that shows late deliveries per region, with accessible SVG charts.
